

# 6 Steps to Laying Out Your Pole Building

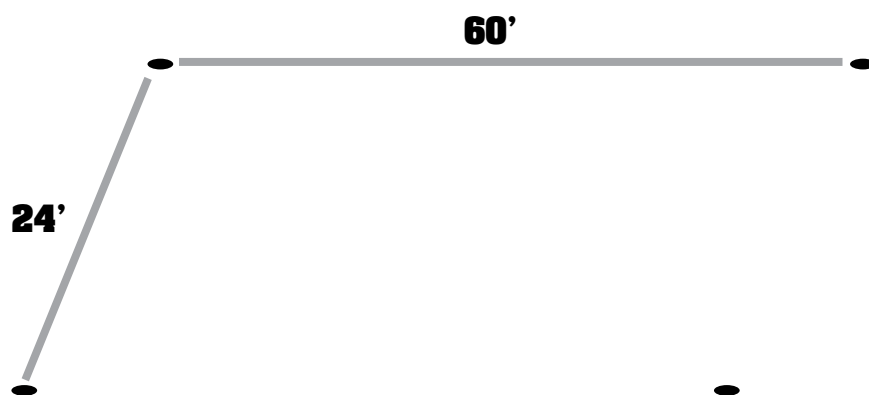

**The Pole Building Experts!**

[www.lockebuildings.com](http://www.lockebuildings.com)

**Step One:** Rough in your outside dimensions of your pole barn by using your tape measure and spray paint the four corners.

marking  
spray paint

## Tool List

Spray Paint (Bright Neon Color)

Ball of String

Sharpie Pen

Hammer

100' Tape Measure

8D Nails

Stake Posts

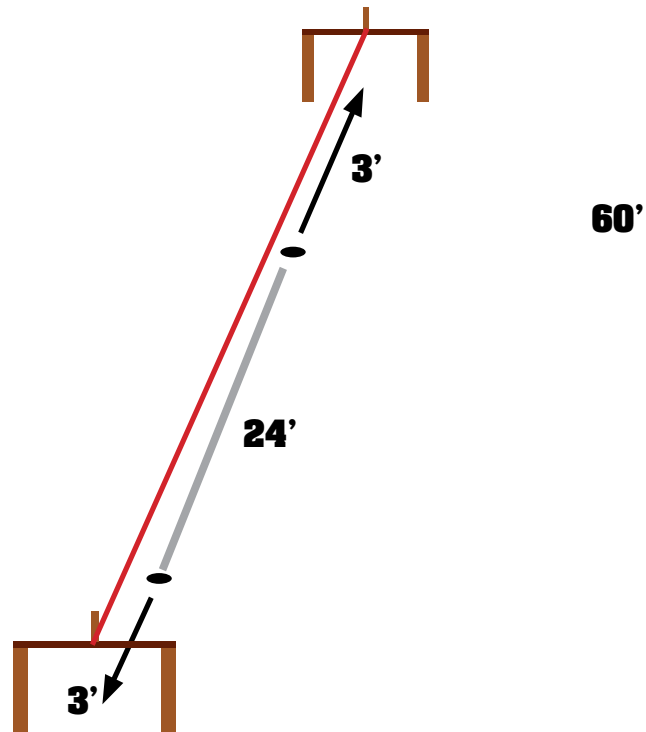

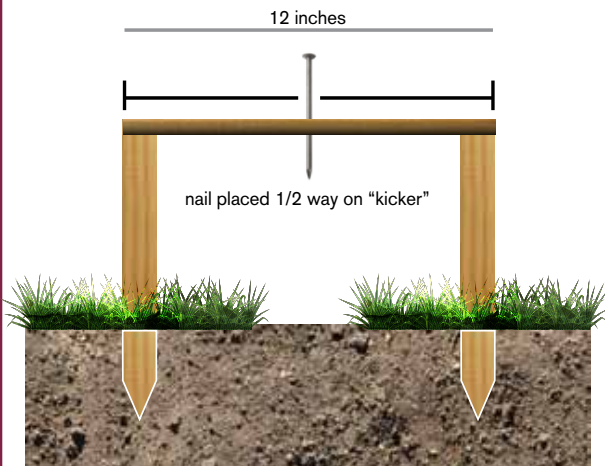

*This is a sample of roughing in a pole barn.*

**Step Two (A):** make eight “kickers” (see A). Set two of the kickers 3’ beyond one of the spray paint marks to line up one of set of marks

**A**

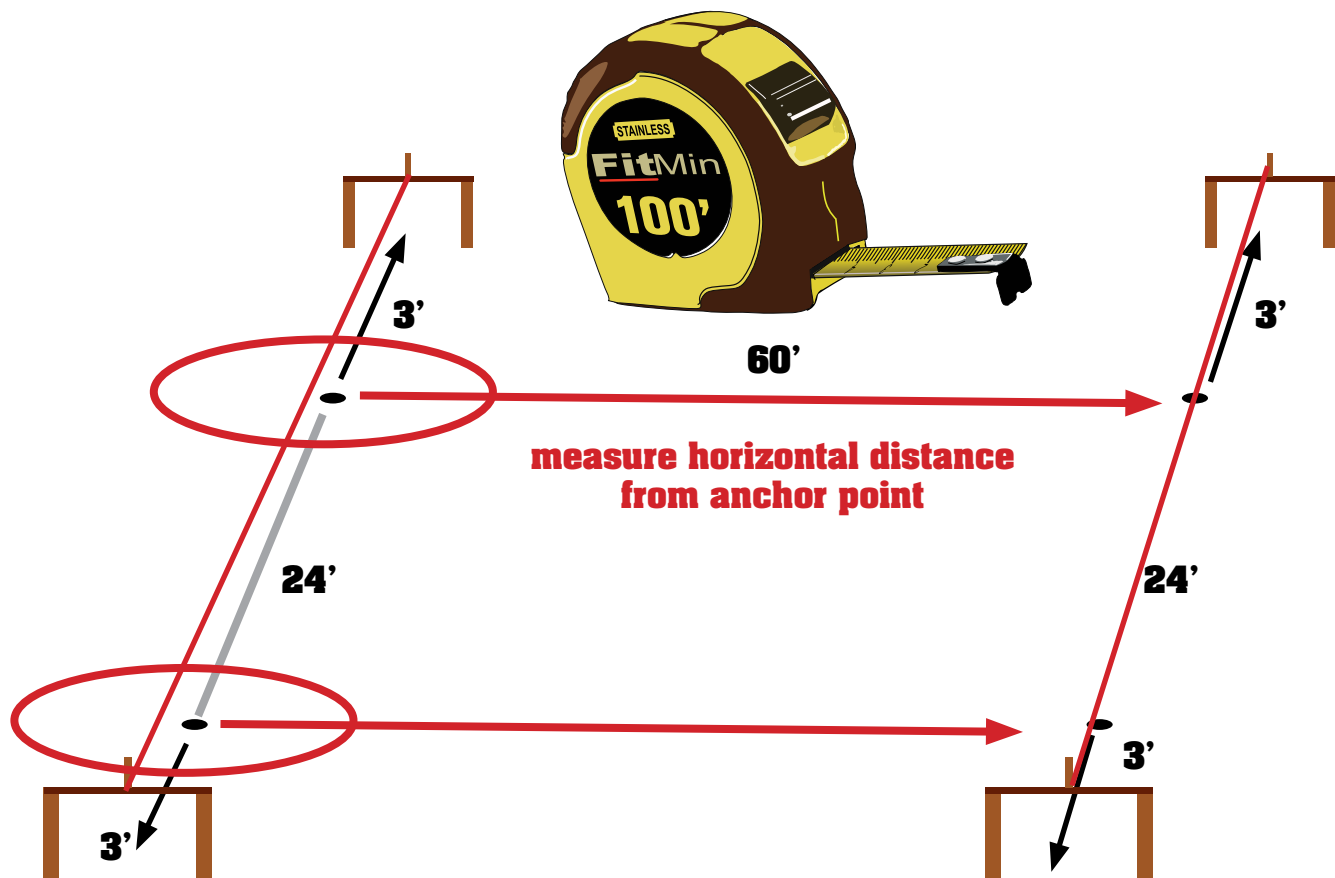

kicker used for  
setting string

*This is a sample of roughing in a pole barn.*

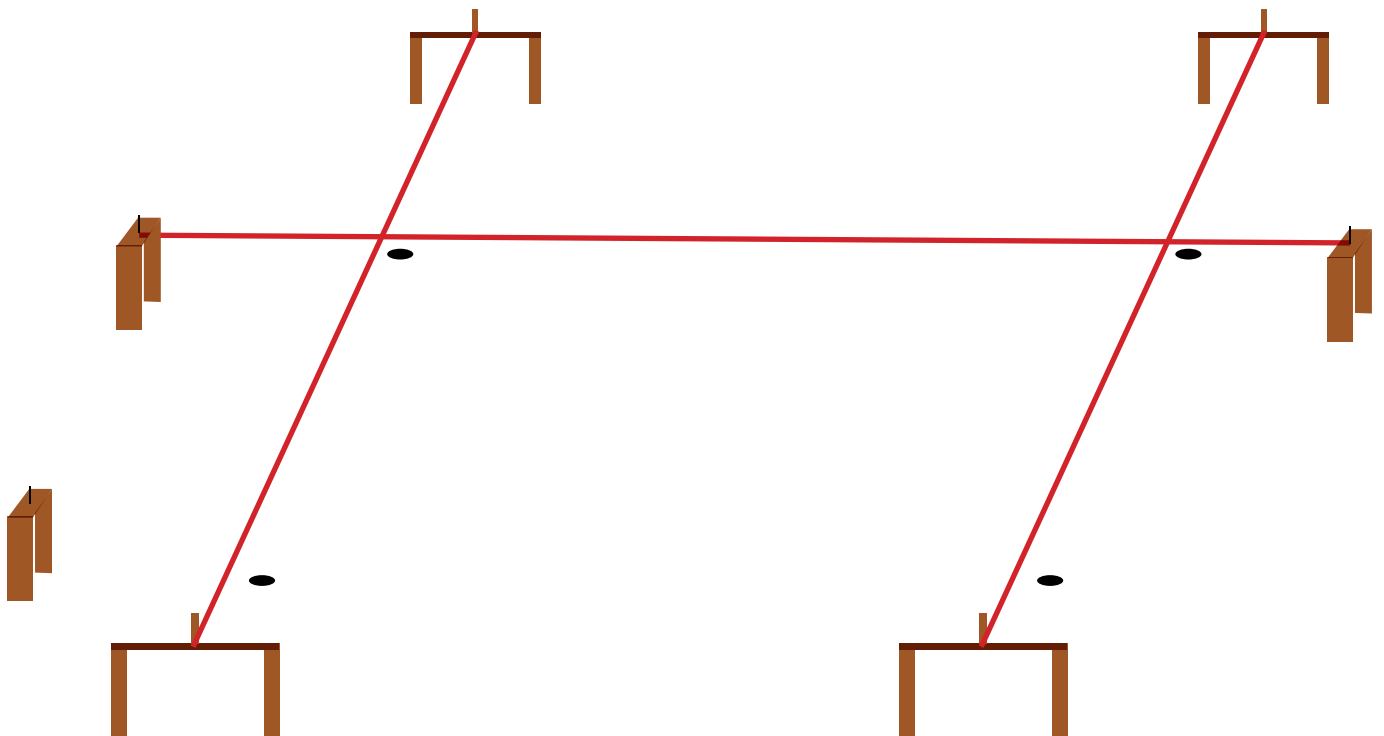

**Step Two (B):** Now just like in Step Two A, you will set the kickers up identical two have two vertical strings that align up.

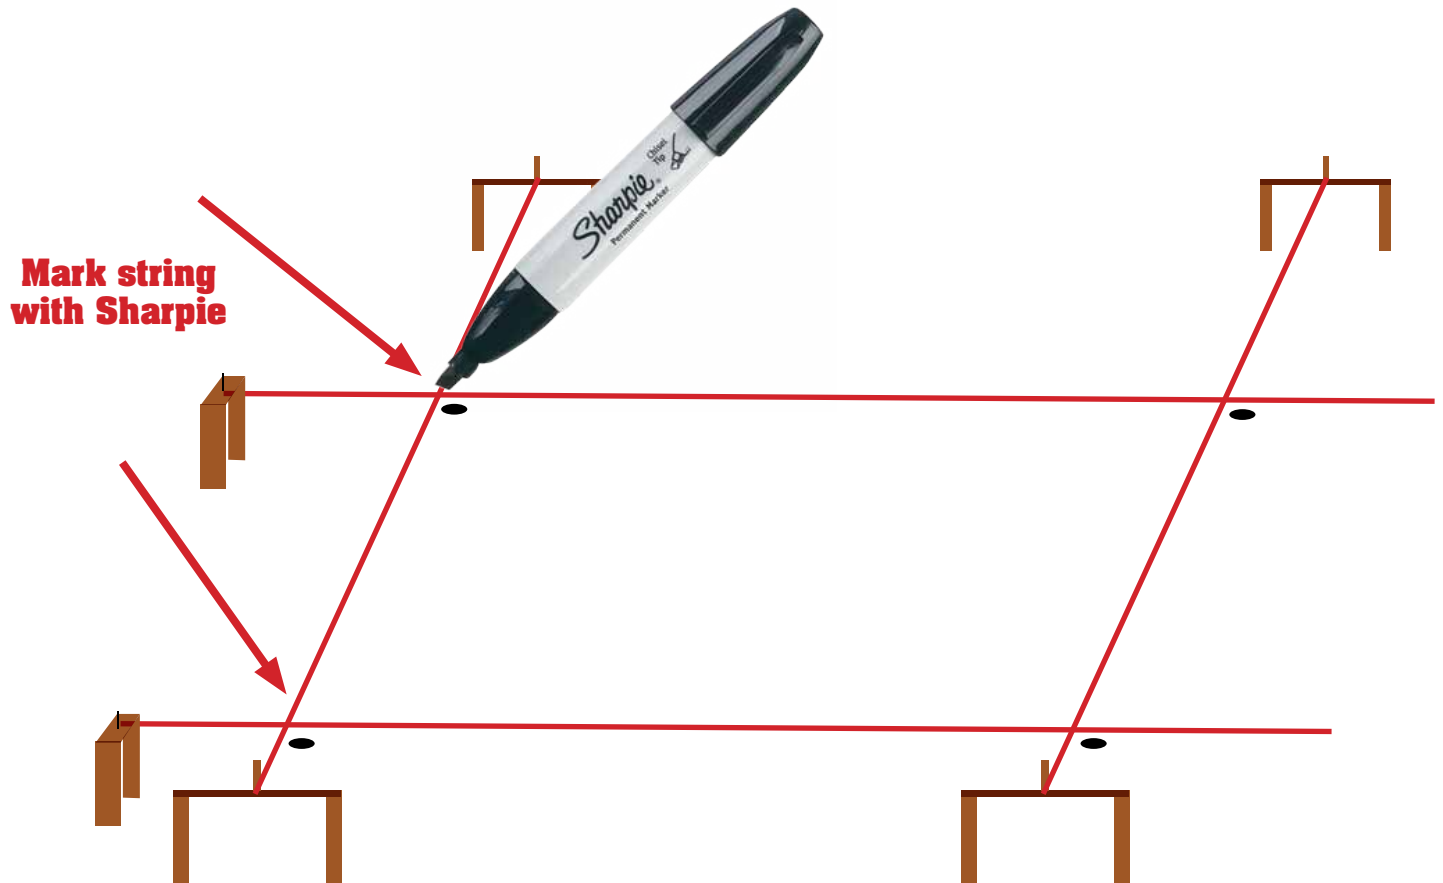

*This is a sample of roughing in a pole barn.*

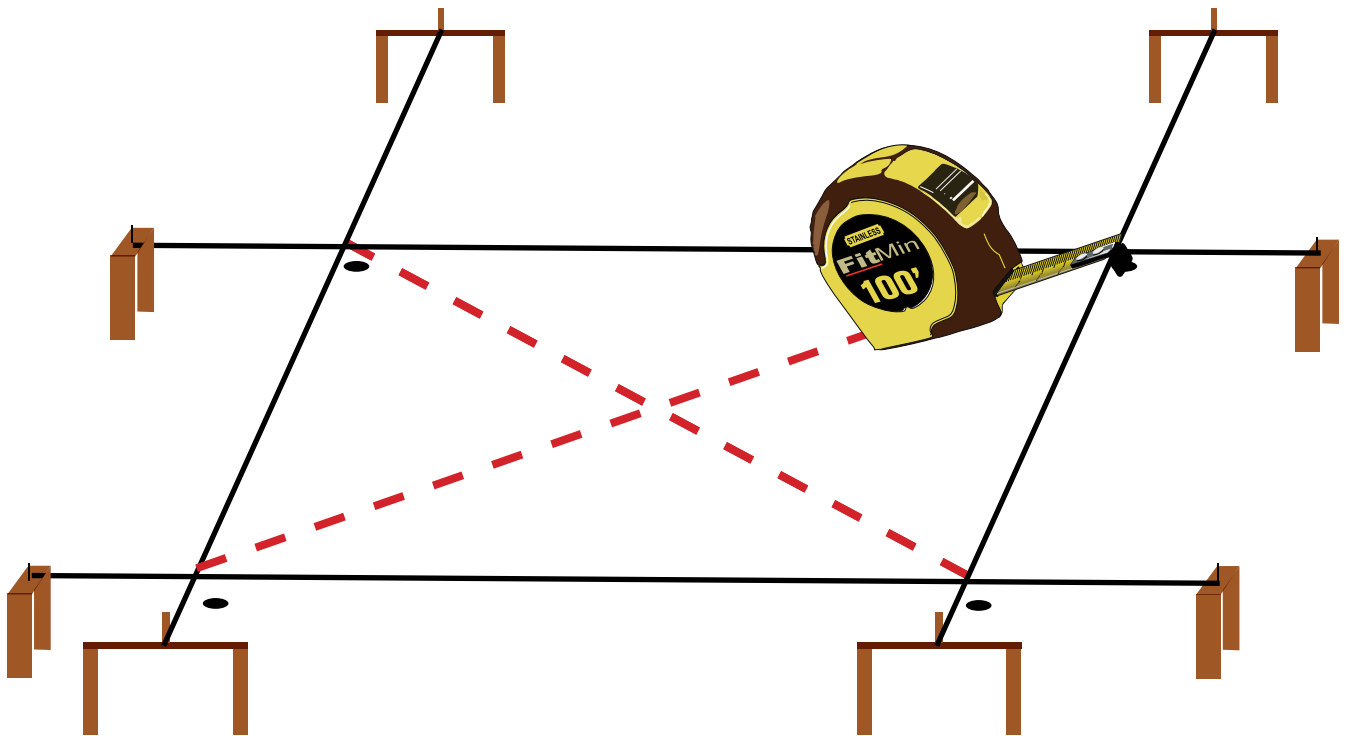

**Step Three:** Set up your horizontal kickers like you did for the vertical.

**Step Four:** Mark string above the marked anchor point with a Sharpie Marker.

**Step Five:** Now you are going to double check all your four corners to make sure that the measurements are square.

**Step Six:** Now spray marks where holes will be drilled for your support beams (per your plans)
